Project Executable Files

Date	10/07/2026
Name	Karuru Arjun
Project Name	Voice-Based Concept Understanding Analyser (VBCUA
Maximum Marks	3 Marks

Project Executable Files:

This section contains all executable and deployable files required to run the **Credit Card Approval Prediction** project. The project is built using Python and machine learning libraries to predict whether a credit card application should be approved or rejected based on applicant details. The solution includes the trained ML model, source code, datasets, and documentation for easy deployment and execution.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt / dependency file	Yes
4	Database schema / seed files	NA
5	Environment Configuration (.env if required)	No
6	Hosted / Deployed Application URL	No
7	APK / Executable Binary	NA
8	Dockerfile / Containerization config	No

9	Test files and test results	Yes
10	Demo Video / Walkthrough	Yes

Step 2: File / Folder Structure

VOICE-BASED-CONCEPT-UNDERSTANDING-ANALYSER/

```
│
├── app.py                  # Main Streamlit application
├── requirements.txt        # Project dependencies
├── README.md               # Project documentation
├── config.py               # Configuration settings
│
├── data/
│   ├── reference_topics.json
│   ├── sample_audio/
│
├── models/
│   ├── whisper_model/
│   ├── sentence_bert/
│
├── modules/
│   ├── speech_to_text.py
│   ├── semantic_analysis.py
```

```
│   ├── audio_analysis.py
│   ├── scoring.py
│   ├── report_generator.py
│   ├── utils.py
│
├── assets/
│   ├── logo.png
│   ├── waveform.png
│

    ├── home_page.png
    ├── result_page.png
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://tv4sqbk7ml3pdapcbowcjf.streamlit.app/
Login Credentials	Not Required
Platform / Hosting Provider	Local Machine (Python + Flask)

Repository Link	https://github.com/23F21A3110/VBCUA
Demo Video Link	https://1drv.ms/v/c/55933b941b9c6eef/IQC7eH-Dl0jeQaae_pZns1OlAXxok8q9q3DIVz0feLtCy2Q?e=2gFKxe

Step 4: Run Instructions

- Clone or download the VBCUA project repository.
- Open the project folder in VS Code.
- Create a virtual environment (optional).
- Install dependencies:
- pip install -r requirements.txt
- Run the Streamlit application:
- streamlit run app.py
- Open the browser.
- http://localhost:8501
- Upload an audio file (.wav or .mp3).
- Select the reference concept.
- Click **Analyze**.
- View:
- Speech Transcript
- Semantic Similarity Score

Step 5: Known Issues / Limitations

S.No	Known Issue	Workaround / Status
1	Works on local machine only	Can be deployed on Render, AWS, or Azure
2	Requires internet for Whisper model (if API used)	Offline Whisper models can be integrated
3	Limited predefined concepts	More concepts can be added easily
