

Customer Journey Map

Date	10/07/2026
Name	Jaswanth Madapuram
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Journey Map:

Phase of Journey	Stage 1 Application	Stage 2 Verification & Prediction	Stage 3 Approval Decision
Actions What does the customer do?	• Applies for a credit card. • Enters personal and financial details. • Uploads required documents.	• Waits while the system verifies the details. • Machine learning model evaluates eligibility. • Checks application status.	• Receives approval or rejection notification. • Reviews the decision. • Uses the approved credit card or reapplies later.
Touchpoint What part of the service do they interact with?	• Online application portal. • Registration form. • Document upload page.	• Verification system. • Machine learning prediction module. • Status tracking page.	• Approval notification. • Customer dashboard. • Email/SMS confirmation.
Customer Thought What is the customer thinking?	• "I hope I qualify." • "Did I provide all the details correctly?" • "Will the process be quick?"	• "Is my credit score sufficient?" • "When will I receive the result?" • "Will my application be approved?"	• "I'm glad the process is complete." • "If rejected, what can I improve?" • "Can I use my credit card immediately?"
Customer Feeling What is the customer feeling?	Hopeful and excited.	Anxious and uncertain while waiting.	Happy and satisfied if approved; disappointed but informed if rejected.
Process Ownership	Customer	Bank Verification System & Machine Learning Model	Bank / Credit Card Issuing Department

Who is in the lead on this?			
Opportunities How can we improve this stage?	• Simple application form. • Easy document upload.	• Faster verification. • Accurate ML predictions.	• Instant notification. • Explain approval/rejection reasons.
