Empathy Map – Credit Card Approval Prediction:

Customer: Credit Card Applicant

SAYS	THINKS
• "I need a credit card for my daily and emergency expenses."	• "Will my application be approved?"
• "I hope the approval process is quick."	• "Do I meet the bank's eligibility criteria?"
• "I have submitted all the required documents."	• "My credit score and income should be sufficient."
• "I want a transparent approval process."	• "I don't want my application to be rejected without a reason."
DOES	FEELS
• Applies for a credit card online or at a bank.	• Anxious while waiting for the approval decision.
• Uploads identity, income, and employment documents.	• Hopeful that the application will be approved.
• Checks application status regularly.	• Confused if the application is delayed or rejected.
• Maintains a good credit history and repayment record.	• Satisfied when the approval process is fast and transparent.

Pain Points:

- Lengthy approval process.
- Lack of transparency in approval decisions.
- Risk of rejection due to poor credit score or insufficient income.
- Manual verification causes delays.

Gains:

- Faster approval decisions.
- Fair and accurate evaluation using machine learning.
- Reduced waiting time.
- Improved customer experience with transparent decision-making.
